

About us

TechnoSummits is the definitive, key technology and business organization that provides highly targeted events with unique interactive format discussion platforms. Organised in a more personal and intimate peer-to-peer environment, our summits bring together Thought leaders and senior decision makers from the Telecoms, Media and Technology (TMT) sector, including representatives from government, service providers, small and large enterprises to address, discuss, and explore industry issues, promote growth and innovation and move the industry forward.

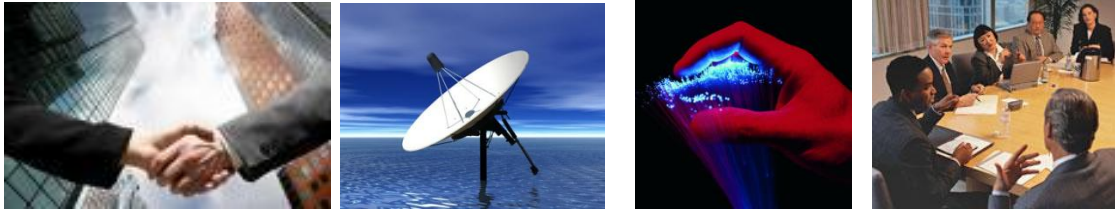

Mission Statement

Our mission is to create and build a highly focused, membership based community of senior level executives for the purpose of enhancing business relationship, promoting knowledge and experience sharing and fostering collaborative work across the value chain.

To this end, we organize highly targeted business events to highlight critical issues in the Telecoms, Media and Technology sector (TMT) by providing an effective platform to enable our members to make strategic business decisions, increase market share and generate new revenues streams. In short, we aim to pursue and facilitate an ecosystem that can turn leads into deals and contacts into contracts.

TechnoSummits Community

TechnoSummits membership provides you with an opportunity to network with peers in your industry. We are constantly building our business community of key decision makers that move the industry forward.

Membership Benefits:

- Ability to network and access to a wide range of players across the value chain, helping you to network and grow your business with your peers in the industry in a more intimate and relaxed environment.
- Participate in the 'brainstorming sessions' and gain valuable insight into the evolving market, allowing you to capitalise on opportunities as they arise.
- Opportunity for collaborative work and meet clients in the TMT sector industry and partnership opportunities with the leading innovators in telecoms, broadcast and media sectors.
- Optimize future business contacts within your industry sector. Help you ensure that members are well positioned to take advantage of new business models that are emerging as a result of convergence
- Be informed of recent trends and new industry initiatives, up-to-date business intelligence, with a focus on the future of Broadband and digital technology markets through our free e-newsletter.
- Receive copy of TechnoVision Magazine downloadable pdf on line.
- Join all the networking activities of TechnoSummits community
- Get substantial discounts on all events organized by TechnoSummits

Cost of Membership

- Please note every new member is required to pay a onetime joining fee of £350 + VAT in addition to their annual subscription of £750 + VAT.

Our events in Trilogy...The story continues

- In summary, our events format follows a narrative in a Trilogy - Pipes, Content, and Convergence.
- **Broadband Connect Summit** focuses on infrastructure and network pipes, including fixed, wireless and mobile. **Media Content World Summit** deals with what you put on these pipes including distribution, management and delivery of digital content and services, and finally, **Digital Convergence Summit**, where all of these elements come together into one converged arena backed up by an all IP network infrastructure backbone.
- Our events are not the conventional stuffy conferences or tradeshows but utilize a unique format that ensures opportunity to digest, dissect and discuss critical issues and presentations in small focus groups.
- They are structured, interactive and inclusive which is conducive to a healthy discussion and ultimately, more effective in providing a much broader perspective from all of the participants. This format also facilitates networking, benchmarking and interaction which are vital parts in achieving the agenda that all of the participants genuinely value.

"I found the Summit to be very informative, addressing the key issues faced by developing technologies. It also brought together a very interesting group of people and set an environment which encouraged interaction and networking". -Andrea Raman, Director of Distribution, CNBC Europe
